FRANK MORGAN, Secretary. now down 120 feet.
The shaft of the Greenleaf mine of the Bos-

The shaft of the Greenleaf mine of the Boston and Montana company has reached a depth of 1,000 feet, and after a station is out some crosscutting will be done in order to determine the character of the country at that depth. The company will, however, continue sinking and intends to put the shaft down at least 1,500 feet. The section of the district, where the company owns several hundred acres of mineral ground, will be thoroughly explored by the Boston and Montana company. The Greenleaf shaft cut a fine looking vein of sulphide cre at a depth of about 600 feet, and it is considered likely that good commercial ore will be found in it at the 1,000 foot point.

good commercial ore will be found in it at the 1,000 foot point.

The station at the 2,800 foot level of the High Ore mine is nearly completed and crosscutting to the veins at that depth will begin as soon as the pumping machinery is installed. With the opening of the ore bodies at the 2,800 the Anaconda company will have 400 feet of stoping ground in the High Ore, as no other crosscutting has been done below the 2,800 foot level. The object in going to the 2,800 foot point without crosscutting at the 2,800 foot point without crosscutting at the 2,800 is to drain the ground of the High Ore as well as handle the water from adjoining mines.

The Parrot company has begun mining in the Little Mina, and after a shatdown of that property for seven years it is again producing ore. The ore from the Clear Grit mine is aso being raised through the Little Mina. Heretofore it has been raised through the Mountain Consolidated shaft. The Little Mina is expected to contribute materially to the production of the Parrot company, for it contains a good vein of copper ore. The shaft is 1,000 feet deep. The shaft on the Parrot mine is also being sunk deeper, and is now down about 1,980 feet. At the 2,000 a station will be cut and orosscuts started to the veins.

DIVIDENDS AND INTEREST

OFFICEN OF THE
ERIE RAILROAD COMPANY.

At a meeting of the Board of Directors held this day there were declared out of the surplus net earnings of the Company up to June 30, 1907, a dividend of two per cent, upon the first preferred capital stock of the Company, payable October 1, 1917, to holders of first preferred acids of coordat the closing of the first preferred acids of coordat the closing of the first preferred capital stock transfer books on September 17, 1907, and a dividend of four per cent, upon the second preferred capital stock payable November 1, 1907, and a dividend of four per cent, upon the second preferred stock of record at the closing of the transfer books on October 10, 1907, and two per cent, payable to holders of second preferred stock of record at the closing of the transfer books on October 10, 1907, and two per cent, payable to holders of second preferred capital stock transfer books on April 10, 1908.

For the payment of such dividend on the first preferred capital stock the transfer books of the second preferred capital stock will be closed at the close of business on September 17, 1907, and be reopened at 10 A. M. on the 9th day of October, 1907.

Hence

make a record for sinking during September. He hopes that at 500 feet pode or bodies will be opened.

The property of the Krao Silver-Lead Mining Company at Amasworth, R. C. owned by Butte men, is looking rood, according to reports from there. The scarrity of labor has made development progress slow.

As a result of the refusal of the smelters and ore buyers to take any large amount of ore from the small companies and independent operators in the Butte district many of the small mines have been compelled to close, while the output from other mines is very much restricted. Among the company, and lessees in the Ophir, Amazon-Butte and East Butte. Extension Copper Company, and lessees in the Ophir, Amazon-Butte and East Butte. With copper a complete reorganization of the Black Hills Porcelain. Clay and Marble Company were the smellers and make a good profit, but at 18 cenis they cannot do it, even were the smellers will map the ore body close to the line which was received under those of the Butte dispute with the Amalgamated Company Shalt No. 2 is to be sunk 50 feet deeper, making a total depth of 250 feet, in order to get under the ore body that was opened on the 200, Good progress is heng; made with shaft No. 3 and when completed it will be used for raising the ore which has been blocked out in the differ from shafts 3, 4 and 5. The shaft is now down 120 feet.

The shaft of the Greenleaf mine of the Boston and Vaccines of the Chicagos of the Chicagos of the Chicagos of the Chicago of the Chicago of the property of the Ohio-Deadwood Mining Company near here 1, 18 Murphy of Los aron, and Vaccines of the property of the Ohio-Deadwood Mining Company near here 1, 18 Murphy of Los aron, and Vaccines of the prime movers in the property of the Ohio-Deadwood Mining Company near here 1, 18 Murphy of Los aron, and Vaccines of the prime movers in the property of the Ohio-Deadwood Mining Company near here 1, 18 Murphy of Los aron, and Vaccines of the prime movers in the property of the Ohio-Deadwood Mining Company. to be taken toward a resumption of work on the property of the Ohio-bendwood Mining Company near here L. B. Murphy of Los Angeles, one of the brime movers in the company, is about to leave for Ohio to get together the stockholders and arrange for a resumption. The company owns the accompany, is about to leave for Ohio to get together the stockholders and arrange for a resumption. The company owns the accompany one, and in a number of open cuts some good grade ore has been exposed, but not well developed. Mr. Murphy has accumulated some money in a California venture and intends using this in developing the Ohio-Deadwood ground.

Drapwood, S. D., Sept. 12 Supt. James Hall is preparing to resume operations on the property of the Gold Queen Mining Company, located in Whistler gulch near this city. The former work consisted of a main shaft down 216 feet and crosscuts to the former work consisted of a main shaft down 216 feet and crosscuts to the phonolite dyke which shows at the surface is encountered, after the mine has been unwatered. There is a fair showing of low grade ore in open cuts and tunnels that warrants further work on the irroperty. About 600 feet above the main shaft, on the ridge of the bill, light development work has disclosed some surface ore that indicates good values with greater depth.

The Spencer and Bock property, a promising prospect near Rochford, has just been bonded to Broken Bow, Neb., men, who intend extensive development. The property adjoins the Golden West Mining Company's ground and shows a gold ledge for a distance of 2,000 feet. Average assays from this ledge run 37 per ton, most of the gold being free milling. The main tunnel, now in 70 feet, is to be continued too feet and later machinery will be installed. The property is principally owned by H. McClellan, a conductor on the Burlington Railway running into Deadwood, and it comprises 350 acres.

Ore shipments from the Bald Mountain district carrying to different mills.

Word from New York indicates that J. D. Hardin, president a

his return to commence operations in the big 500 ton eyande mill on the property. It has required over two years to complete this mill, which is declared to be the finest equipped and second largest in the Black Hills. which is declared to be the finest equipped and second largest in the Black Hills.

ABOUT THE LAKES.

CALIMET, Sept. 14. What promises to develop into a stampede rivalling that of the rush to Cobali upon the discovery of silver there is promised at Michipicoten Island through the recent discovery there of native copper and silver in rich quantities. News of the find, which was made by Gordon L. Michael, the prospector of the Soo, is just gaining currency. Last February Mr. Michael while on a business trip to Toronto made some inquiries relative to the Michipicoten Island properties and was surprised to learn that nearly three-fourths of the territory was vested in the Crown and open for staking: He has always had great faith in the mineral resources of Algoma and more particularly those of the Michipicoten district. He returned home and made preparations for exploring the new field.

Early in the spring he went up to the island, which is located in Lake Superior about one hundred and fifty miles above the Soo and some forty miles across from Michipicoten harbor. He made a personal investigation, and although at that time the north shore of the island was covered with snow and ice he satisfied himself that it was a splendid field for exploration. He immediately interested R. B. Cochrane of Steelton, Ontario, a successful prospector of wide experience and knowledge, and the two started for the island about July 1. They have since been exploring the island with remarkable success. Mr. Michael returned to the Soo a few days ago and brought a number of samples of ore with him.

An interesting mining deal has been consummated in the Soo whereby the Cobden property, one of the richest copper prospects in Ontario, has passed into the hands of an English syndicate, represented by Louis J. Abraham, former manager of the Bruce Mines Copper Company. The syndicate is prepared to spend a large amount of money in proving the value of the property. They say they will expend \$100,000. The shaft at the mine at the present time h ABOUT THE LAKES.

It is stated that the net profits of the San Low mine, situated in the Santa Eulalia district state of Chibushus, will be increased to more than \$6.000 per day as soon as ample facilities are provided for shipping ore.

Charles M. Schwab is the principal stock-

owners are a rich caniforma company whose placers there are exhausted and its members are flying to the north for new fields. Henresentatives of the company have been on the fletd for years. The ground not benight on Dominion Creek extends from No. 10 about Upper Discover. 15 No. 223 below Lower Discover. 4 distance of twenty miles. Tominion is the iongest paying creek in the Kiendike camp and has riveled many for times. It is the richest stream on the Indian side of the High Dive and the first stream on that ode to be bought by a big corporation. Granville tamp, which comprises the lower few miles of Dominion Creek, was purchased recently, presumably for the Mornisch people. Indian River is thirty niles long and is also the xtension of Dominion, which is staked from end to end, Gold Run Sulphur, Eureka, Quartz and other rich creeks have been organized to a arge extent and also may be bought. Representatives of several of the richest dredging concerns in America have been here within the last few weeks looking over various creeks. The Dominion deal is the first deliberate move to acquire mammoth tracts since the Guggenbeins took over Romanza Bonanza. Hanker the related Mining and Railway Company and crushed 2022 tons of ore during July. The value was \$187.85. The working express amounted to \$114.74.

The Constancia Mining Company is making large shipments to the Torreon smeller from its properties in the Sierra Morada district. The Torreon smeller is receiving about 250 tons of ore per day.

The Fay-t-angua Mining Company, which is composed of Duluth Minn, men, has taken over the holdings of the Fortune Mining Company in the Cananea district. Its holdings now aggregate 7,000 acres of mineral land.

A contest is being waged in the courts between the rival claimants to the Cadena de Cobre mine, situated in the State of Sonora.

The Virginia and Mexico Mine and Smelter corporation will erect a reduction plant at its mines in the Hostotipacquillo district. State of Jalisco, at a cost of \$80,000. This company owns the Cabrera, Perulta and America mines. There is an abundance of miling ore ready for the new plant.

The Coba del Cobre Mining Company has put into commission traction engines for hauling its ores from the mines near Nazas, State of Durango, to the town of Maping, where connection is made with the railroad. The present output of the mine is from 75 to 100 tons of ore per day.

The Penoles Mining Company has become an active competitor in the smelting business with the American Smelting and Refining Company. It is now smelting from its own mines from 800 to 1,000 tons daily and has etablished ore buying age cess throughout Mexico. These agencies are furnishing the company's smelter with about 15,000 tons of ore per month in addition to its own output.

The Benito Juarez Mines Company, composed of Americans, is arranging to erect a modern mill and evanide plant with a daily capacity of 200 tons at its mines near Saninas del Penon Blanco, State of Zacatecas. The company has about 100.000 tons of ore ore per month in addition to its own output.

weeks looking over various creeks. The Dominion deal is the first deliberate move to acquire mammoth tracts since the Guggenbeims took over Bonanza Bonanza. Hunker and Eldorado creeks last year at a cost of millions. The Guggenbeims are continuing to buy along those three creeks the scattering claims they failed to get last year.

Former Governor W. B. Meinnes, now the Western representative of the Guggenbeims in their Alaskan exploration ventures, is in Scattle to-day, direct from the Klondike the says the Canadian Yukon gold output will be only about \$1,000,000 this season. This ought to be considered bedrock for the Yukon and is insignificant in comparison with former years. The Guggenbeim system will have seventy miles of ditches, flumes, and piping, he says. The ditches are so capacious that two wagons may be driven side by side along the floor.

This year the dry season materially affected the output. There have been no hydraulic operations worth speaking of The large work has been carried on by dredges, of which there are now seven in operation, with five core large most leven assembled and made capacity of 200 tons at its mines near Saninas del Penon Blanco, State of Zacatecas. made mining machinery is pour-

ing into Mexico in trainloads daily. The demand for American machinery for mines and mills was never so great.

A number of strikes of bonanza ores have been made in the Guanacevi district. State of Durango. The Porvenir, the Nuevo Australia and the Soto mines, all situated near tGuanacevi, are now producing rich silver ore and are paying handsome dividends Frank Moorehouse is manager of these properties.

SUPERIOR TRON FIELDS.

Western Federation of Miners Scores Flasco-Big Lake Tonnage.

to cause alarm, great inconvenience is certain to be felt.

In southeastern Alaska, in the Yankee Basin, Pete Early and John G. Heid have been bammering away for two years on a long tunnel to cut the big Julia ledge and have reached the ore body at the end of a bore 800 feet long, finding there ore of a higher grade than at the surface. The point at which the ore body was struck is 450 feet vertically below the surface.

The Julia group of claims is owned by McWilliams Bros. of Douglas, estate of Donald Frazier, David Conkle, P. S. Farly and Elizabeth Docker. It is bonded to John G. Heid for \$00,000 and the bond expires on November 1, but it is said that capitalists have already secured an option on it for something over \$1,00,000 and there is now not much doubt about them taking hold of it. The Yankee Basin is thirty-five miles from Juneau and Douglas. For the double purpose of drainage and ore conveying the Perseverance mine in the Silver Bow Basin will construct a stunnel two miles long from Sheep Creek to the mine.

Two men on the Big Chem, have struck CALUMET, Mich., Sept. 14. The Oliver Iron Mining Company has done nothing on Great nounced many months ago, either in mining or preparation. The one Great Northern property that was open and in shape for some shipment this year has been idle all season and there are as yet no signs of activity. A considerable amount of drilling, however, has been done on various portions of the lands since the deal for a lease was first

Two men on the Big Chena have struck pay that is running \$40 a day each. The gold is all coarse. There are miles of shallow digrings along this stream.

Kittleson and Williams, on the upper end of 13, on Goldstream, working four men in the drift for one week, cleaned up \$4,000. The gold is the coarsest on the creek and is considered to come out of Glenn Gulch, as it has a different assay value from that of Goldstream. Mr. St. George recently brought one sack of \$2,500 to lown, consisting entirely of nuggets running from 50 cents to \$10. Pay has now been located clear down to 23 below 26 and 28 also have the pay located. In fact, 26 is considered to be one of the best on the creek. announced by the Great Northern road and the cores have in general borne out the condition supposed to exist. Labor agitators representing the Western Federation of Miners have been on all Lake Superior ranges recently in an attempt to

organize the miners. The reception they have met has been rather remarkable. One agitator went into Hurley, Gogebic range, and as soon as his presence was known the business men of the town invited him to go across the State line to Ironwood, accompanying the invitation by such representations as made it seem wise to accept instantly. At Ironwood, no sooner were his placards of meetings distributed on the streets than the business men there met him and invited him to leave town and the Gogebic range and he did. On a subsequent visit to the Menominee range at Crystal Falls a committee of about twenty met him, requested him not to deliver the address he had advertised and turned out the lights of the hall he had hired. The people of one other town informed the walking delegate sent there that they had had one experience of strikes and the soup kitchens subsequent thereto and did not want any more. If he did not leave and stay away, they said, they would be forced to put him out forcibly. At Ishpeming and other points of the Marquette range the same wall of opposition was met and at no points on Lake Superior has the federation as yet been able to extend the organization.

During the last few months lake iron ore tonnage to the amount of 67,000 gross tons capacity a trip has been put into commission, including one 12,000 ton vessel, one 11,000 ton, three 10,000 tons and two of 7,000. The development of the Biwabik Mining Company this season has been good and the season ends. The estimate for this year's production called for 740,000 tons and thus far 500,000 tons have been taken from the pit. Week before last 80,000 tons were shipped, breaking all previous records. Frequently the daily ship ments of the mine than a month. Four shovels are at work, three in the ore and one in the stripping. A crusher is being built adjacent to the mine.

The shaft at the Bangor mine will be turned over to the operating company in a few days by the New York Foundation Company under the direction of E. W. Adgate. The professional contents shafts were sunk in unusually quick time. WASHINGTON.

SEATTLE, Sept. 9. A new strike of placer gold has been made in the Slate Creek region in Whatcom county. It is on claims owned by Seattle and Mount Vernon men, and while no particulars are known it is said that the find is sensational.

Work has begun on a crosscut tunnel which will strike the Statlight, Evening Star, Good Hope and Fortunate veins and a copper lead, all on the Good Hope property and within a distance of 1,100 feet. This same crosscut will also touch five leads of the Smuggler property, 1,000 feet below the Smuggler main workings. There are 10,000 tons of fine ore already in sight in the Starlight vein alone. The ore shoot on the Evening tar is over four feet wide and 200 feet long, and the ore averages about 330 to the ton. The Good Hope property is largely owned by Portland people. across the State line to Ironwood, accompanying the invitation by such representations Boise. Sept 8.—The machinery of the mill at the Atlantic mines is now on the ground, and will soon all be in place Besides a large crusher concentrators are going in. The company has also put in an electric plant. The Minerva company, in the same vicinity, is increasing its mill from a ten to a forty stamp. More concentrators will also be added.

Work on the long tunnel to tap the McKinley mines near idaho City at the depth of 2,000 feet is progressing day and night. As it cuts across the mineral zone it is hoped to open up good veins before those that come to the surface are reached.

Much work is now going on in the free gold quartz mines on Hay Fork of Move Creek, Some of them are turning out very rich and a stamp mill will be erected before winter.

The big giant mill to go up at the mines on Shaw's Mountain will soon arrive. The mines are yielding rich over from a depth of 500 feet.

The owners of the Gold Hill mines and

MINE PUMPS.

mines are yielding rich ore from a depth of 500 feet.

The owners of the Gold Hill mines and twenty-five stamp mill at Quartzburg are preparing to pump out the workings and resume work. For over twenty years the mill ran day and night and turned out dividends every month. The machinery is the very best, including large hoisting works and pumps. It is also the intention to resume work in the lowa mines and start up the twenty stamp mill.

While running a tunnel into the mountain six miles east of Boise Quaries & Co. cut a large quartz ledge that assays well in gold.

They will drift on it. STATION AND SINKING MINING PUMPS.
THE SLOGAN OF THE CAMERON—
"CHARACTER THE GRANDEST THING."
Over 60,000 CAMERON pumps in daily satisfactory use all over the world give tangible proof of their merit and confirm the claim for their superiority over all others. They are conceded to be the most durable, reliable and effective mining pumps on the market to day, and while often imitated are never equalled. For proof, inquire of any mining engineer; for the latest catalog "C" and prices, write any of our resident agents or direct to the

> \$1,000 for \$100.

for \$100.

Look into this; if I cannot convince you I am out my time, cost of advertisement, etc. Do not send stamp. I have a straightforward, honest investment, if you have at least \$100, and can pay in, say, 530 or \$40 monthly, you can make, with absolutely no risk, \$1,000 for every \$100 you can invest during the next few years. A Providence, B. L. gentleman wrote me a few days ago: "Your advertisement states a return of \$1,000 in a few years for every \$100 invested. This gentleman hought to the safe investment." This gentleman hought to the extent of \$5,000 cash. I want the inquiries of serious, earnest people; the more they know about business the easier it makes my task of convincing. Highest bank references and to bankers and business men in all lines who have invested through me.
